I am glad to learn that attention to the subject of fees and licensing is being addressed.
The testing and the requirement of tracking down a proctor and the location, etc.
is difficult for some, if not most in these busy times.
At any time the rules of operation are followed it would provide the reporting of inappropriate behavior would easy reported and investigated. The actions of the operator can be addressed as needed in accordance with present policy.
Let us begin a smoother process of licensing and issue a call sign and allow operators to use the bands allowed!
